Customer information on novotek products regarding substance restrictions

Dear Ladies and Gentlemen,

the safety of our products and the protection of the environment are important concerns for novotek Vakuumtechnik GmbH. We work together with our suppliers to design our products in an environmentally friendly way. We hereby take a stand on the following EU regulations and EU directives:

- REACH, Regulation (EC/1907/2006) on the Registration, Evaluation, Authorisation and Restriction of Chemicals.
In accordance with Article 33, we draw your attention to the fact that the products included in the following table contain substances of the REACH SVHC candidate list in a concentration greater than 0.1% by mass. The attached table is updated cyclically.
- EU RoHS 2, Directive (2011/65/EU) on the restriction of the use of certain hazardous substances in electrical and electronic equipment. In the following table we indicate the non-compliant products with regard to this RoHS Directive.

Based on the information available to us, we can provide the following overview for novotek products at the present time. If a novotek product is not in this table, it does not contain any declarable concentrations of substances on the SVHC candidate list and is RoHS compliant.

With kind regards

novotek Vakuumtechnik GmbH
